TIP OF THE MONTH

Now is the time for pruning of any flowering spring plants passed their bloom time. Keep up with thorough deep watering through all dry spells for the fullest summer blooms!

SUMMER IS HERE!

Georgia, days get hot. Very hot. The weather is muggy in July but turns dry in August, testing plants' resilience and homeowners' care. Local lawns either love it and thrive or suffer from the heat and get nasty pests and diseases. Proper maintenance is vital.

Summer Lawn Care Tips

- ✓ Keep mower blades sharp
- ✓ Don't cut the grass too low
- ✓ Water the yard well & early
- ✓ When in doubt, seek professional help

We just want to thank all of our customers for allowing us an opportunity to provide a quality service to your homes and properties!
